**B**eautiful summer skin is about so much more than good genes, although they do help. Getting that dewy, sunkissed, all-natural look when it's 30 degrees outside and you're in and out of air conditioning is all about good prep and excellent products. Luckily, one of the world's most luxurious beauty and skincare brands, Jurgen Klein's JK7, all made in Hawaii, will help you on your way to summer skin nirvana.

## Moisturise

JK7 is both high-performing and 100 per cent natural, meaning you'll see results but won't be putting any chemical nasties onto your skin. Every ingredient is of the highest quality, so this little miracle in a bottle is filled with precious essential oils, including jasmine, neroli, rose and patchouli, all combined to increase elasticity, reduce small lines and wrinkles and leave your face radiant and smooth – perfect holiday prep.

## Smoothe

Body oils are brilliant for not only keeping skin moisturised and hydrated but also adding a deliciously healthy lustre, not to mention a subtle scent that can last all day. Step out of the shower and treat your body with this orange and sweet almond-infused oil which both invigorates and soothes. Use it in a massage too for the ultimate treat.

### Cleanse

Preparing your skin before it hits the sun with this bamboo powder, vanilla bean and chamomile scrub will help deeply cleanse the face and gently remove dead skin cells, leaving you with better, fresher skin.

### Rejuvenate

Perfect for everyday use, or as an extra night-time indulgence for deep regeneration, this rich unguent of ginkgo biloba, chamomile and marshmallow, combined with natural antioxidants like pomegranate and green tea, should be massaged lightly onto the face to really help combat fine lines.
